

A terminal window displaying a large, intricate ASCII art graphic. The graphic consists of various symbols, numbers, and letters arranged in a grid-like pattern, creating a complex visual effect. The terminal window has a menu bar with options like 'Archivo', 'Editar', 'Ver', 'Buscar', 'Terminal', and 'Ayuda'.

8. rev – Textos y ficheros invertidos

El comando rev imprimirá de manera inversa las palabras o frases que tecleemos. Primero lanzamos el comando rev, y después tecleamos (finalizamos con Ctrl+C)

```

tic@server-aula1:~$ rev
Hola
aloH
Adios
soidA
Estamos jugando con Linux
xuniL noc odnaguj somatsE
amor a roma
amor a roma
  
```

9. pi - Tantos decimales del número pi

A terminal window showing the command 'pi' being executed. The output displays the value of pi to 15 decimal places. The terminal window has a menu bar with options like 'Archivo', 'Editar', 'Ver', 'Buscar', 'Terminal', and 'Ayuda'.

```

tic@server-aula1:~$ pi 15
3.14159265358979
tic@server-aula1:~$ pi 1000

10. factor - factoriza números

Este comando permite sacar los factores primos de un número!!!

```
$ factor 60
```

```
60: 2 2 3 5
```

If you still remember your school maths, factoring a prime number would produce only the number itself and no factors.

11. xcowsay

`xcowsay` es la versión gráfica del comando `cowsay` command, and you need a running desktop (X display) to use it. It cannot work solely from a terminal.

```
$ xcowsay "hello"
```

12. xeyes

`xeyes` es la versión gráfica que muestra un par de ojos en el escritorio y que sigue la localización del cursor

```
$ xeyes
```

14. aafire – quema la consola

El comando `aafire` muestra una animación ascii de que se está quemando la consola.

```
$ aafire
```
